### VULNERABILITY ESTIMATE FOR MISSION C245C

#### CONCLUSION:

There are no known surface-to-air missile defenses in South China capable of interfering with Mission C245C. The risk of a successful U-2 intercept by a MIG-21 on this mission is less than 22%.

#### GENERAL:

The MIG-15, 17, and 19 do not present a threat to the U-2 at 69,000 feet. Of these three fighter types, none can cruise supersonic. The MIG-19 can exceed Mach 1, perform a dynamic climb to approximately 62,000 feet and cruise subsonic, steady state at 59,000 plus or minus 1000 feet. The MIG-19 does not have sufficient power to perform an effective ZOOM maneuver.

The MIG-21 has the capability of intercepting the U-2 at 69,000 feet by performing a ZOOM maneuver and launching an AA-2 Sidewinder type IR missile.

There are four airfields in this area pertinent to Mission C245C. They are Wuhu, Lei Yang, Luchiao and Fu Chou.

## AIR ORDER OF BATTLE FOR SOUTH CHINA:

MIG-21's have been noted in photography

If this assumption is correct, then the estimated risk of	a	
successful MIG-21 intercept against the U-2 at 69,000 feet is less than 22%.		_
